

# RECHARGEABLE BATTERY DISPOSAL

Rechargeable batteries are considered **hazardous waste** and must be carefully and **properly disposed**.

These batteries are **extremely flammable** and can start fires when placed in your household trash or the trash pit at the Transfer Station.

To dispose of rechargeable batteries, bring them to the **Transfer Station** and place them on the electronics recycling shelf on the **upper level**.

**Rechargeable batteries are found in many commonly used household items.**

Phones & tablets

Laptops

Bluetooth headphones

Smartwatches

E-bikes & e-scooters

Hearing aids

Children's toys

Power tools

Cordless vacuums

Portable power banks

Digital cameras

Smart home devices

Electric toothbrushes

Medical equipment

When properly recycled, the valuable metals in these batteries (such as nickel, cobalt, and lithium) can be reused to make new products!

**Types of rechargeable batteries:**

- Li-Ion** (Lithium Ion)
- Ni-CD** (Nickel Cadmium)
- Ni-NH** (Nickel metal Hydride)
- Ni-Zn** (Nickel Zinc)
