

# Fire Technical Section Now REQUIRED

## 1 When Applying for a Permit:

🔥 **New Homes & Additions** - Use Fire instead of Mechanical Technical Sections for:

- |  |                              |                     |
|--|------------------------------|---------------------|
| • Kitchen Hood Systems                         | • Generators                 | • Prefab Fireplaces |
| • Gas Hot Water Heaters                        | • Furnaces                   | • Boilers           |
| • Pool Heaters                                 | • Oil Tank Installations     | • Smoke & Carbon    |
| • Gas fired Appliances<br>(Range, Dryer, etc.) | • Heating Venting<br>Systems | Monoxide Detectors  |

🔥 **Oil Tank REMOVAL** - Fire Technical Section used instead of Building

🔥 **Oil Tank INSTALL** - Fire Technical Section used (Building & Plumbing also required if underground)

🔥 **Solar Panel Installation** - Building, Electric & Fire Technical Sections Required

## 2 When Calling to Schedule Inspections on an Approved Permit:

🔥 Please schedule FIRE ROUGH inspections on all new homes & additions for:

- |  |                              |                     |
|--|------------------------------|---------------------|
| • Kitchen Hood Systems                         | • Generators                 | • Prefab Fireplaces |
| • Gas Hot Water Heaters                        | • Furnaces                   | • Boilers           |
| • Pool Heaters                                 | • Oil Tank Installations     | • Smoke & Carbon    |
| • Gas fired Appliances<br>(Range, Dryer, etc.) | • Heating Venting<br>Systems | Monoxide Detectors  |
